WHAT

Research Professional

- Research Professional is a research funding database to which UCD subscribes and which is accessible by all UCD researchers on its campuses. It is also accessible to all researchers offsite should they have a registered account.
- Currently there are over 8,000 open funding opportunities listed which researchers at Irish Institutions are eligible to apply. The data base pulls in calls from the European Commission, the US Federal Government, national funding bodies like the Irish Research Council or the Research Councils UK, right down to private charities and associations.
- Search by your discipline, by your subject or by your research area. Save your searches and set them up as Email Alerts. Have multiple, relevant funding opportunities sent directly to your email inbox. Build, use and amend your searches as you like.
